Experience

🏢 **AB Tasty** — Full Stack Developer (apprenticeship)

📅 Sept 2024 - present

React PHP

Developing a tool that enables corporate marketing teams to take control of their websites, conduct A/B testing, and make accurate product recommendations

- Revamp of user flow processes for better user experience
- Evaluation of JavaScript code in the application's code editors to ensure that it does not produce compilation errors in the back-end
- Implementation of a generic component across all projects to ensure that all usage and design are the same

🏢 **Jexlprod** — Full Stack Developer (apprenticeship)

📅 Sept 2022 - Aug 2024

React PHP SQL Figma

Platform for friendly encounters around socio-cultural events

- Complete development of a web application mockup
- Implementation of user's privilege and authorisation
- Creation of a WebSocket messaging service

Featured Projects

🏢 **Transat**

React Native Tailwind Go Figma

Cross-platform application created by student for centralising campus services and promoting social connections. More details at github.com/pluginmt/transat-app

🌿 **La Palme Verte**

React Tailwind Notion Figma

Showcase website, blog and photo gallery for a student scuba diving association. The back office is managed by Notion using an API. More details at la-palme-verte.vercel.app
